

CARE TECH SOLUTIONS

Innovating Healthcare for a Healthier Future

Message from the Chief Executive Officer

Milica Cadenovic Chief Executive Officer

CARE TECH SOLUTIONS

delivers healthcare technology, clinical engineering, and integrated infrastructure solutions across international healthcare markets. Over the past decade, the group has expanded its operational capabilities across healthcare technology integration, operating theatres, ICU systems, clinical engineering, and healthcare modernization projects. Through strategic partnerships and engineering expertise, we continue to support healthcare institutions with reliable, scalable, and technology driven solutions.

CARE TECH SOLUTIONS

Integrated Healthcare Technology Solutions

- **Medical Equipment Distribution**
Specializing in the distribution of medical equipment.
- **Turnkey Hospital Projects**
Turnkey healthcare infrastructure and clinical environment integration.
- **Clinical Engineering**
Expertise in managing and maintaining clinical engineering services.
- **Digital Healthcare Integration**
Integrating digital technologies into healthcare systems.
- **ICU & Operating Theatre Solutions**
Delivering specialized solutions for ICUs and operating theatres.
- **Healthcare Infrastructure Modernization**
Upgrading and modernizing healthcare infrastructure.

Supporting healthcare institutions through engineering, technology integration, clinical infrastructure, and long-term operational support.

Group at a Glance

Global Presence & Operational Scale

Global Employees

500+ professionals worldwide

Engineers & Technical Specialists

120+ experts

Countries Served

15+ countries

Annual Projects

100+ projects annually

Healthcare Facilities Supported

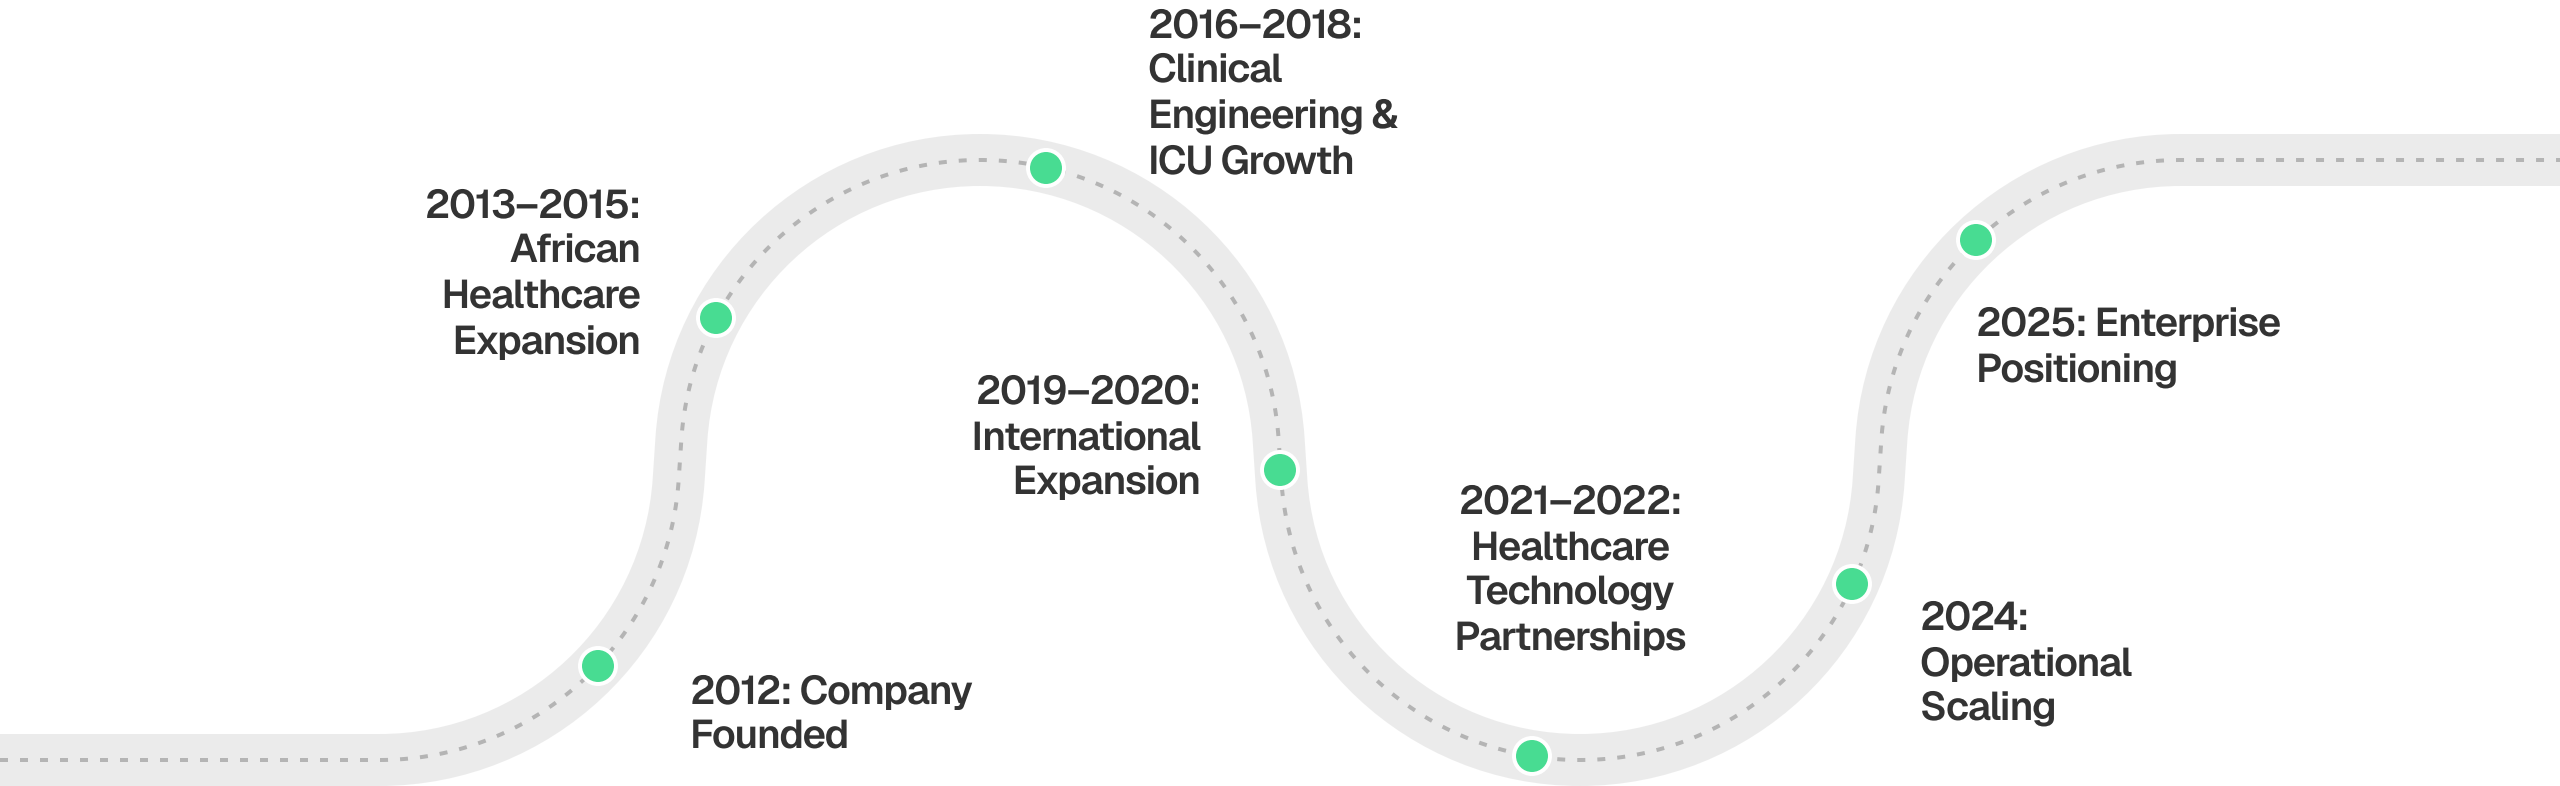

200+ facilities

International Offices

12 global offices

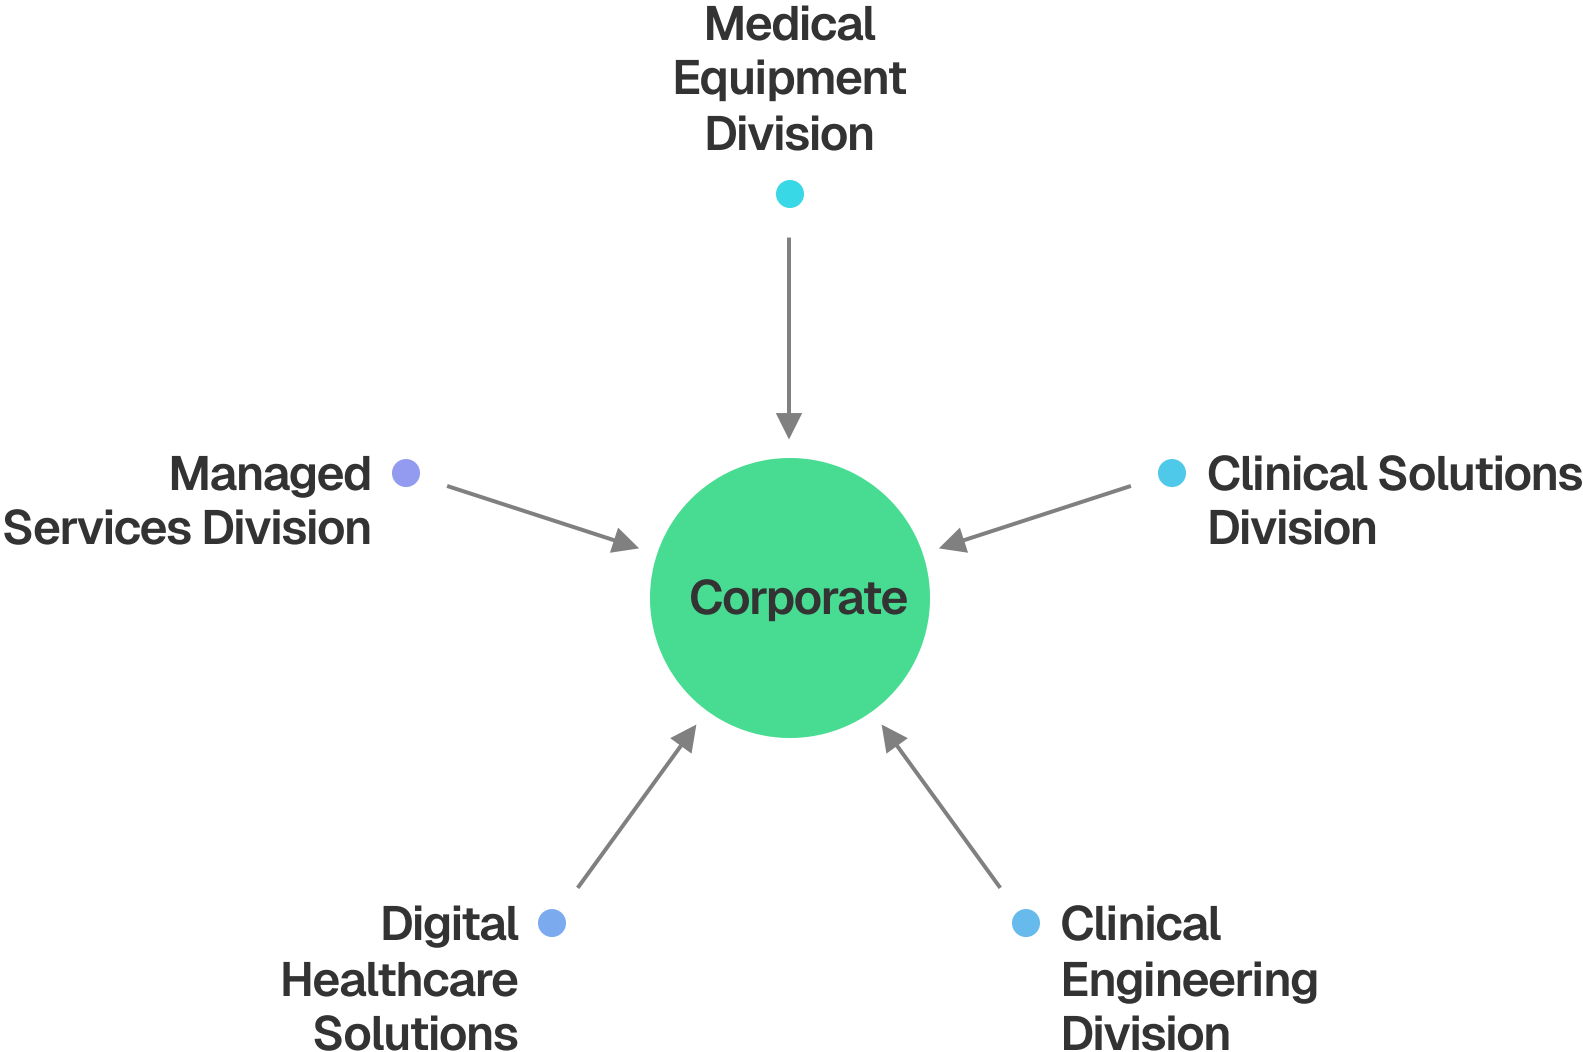

Company History & Growth Timeline

Corporate Structure

Integrated Healthcare Operations Structure

Supporting healthcare infrastructure, engineering, technology integration, and managed services operations.

Core Business Capabilities

Our primary areas of expertise and service offerings

- **Medical Equipment Distribution**

Distribution of advanced medical technologies and clinical systems.

- **Turnkey Hospital Projects**

Turnkey healthcare infrastructure and clinical environment integration.

- **ICU & Critical Care Systems**

Specializing in advanced systems for intensive care units.

- **Operating Theatre Integration**

Seamlessly integrating technology and equipment within operating rooms.

- **Clinical Engineering**

Lifecycle engineering support and technical management.

- **Digital Healthcare Solutions**

Developing and implementing innovative digital health platforms and services.

Advanced Clinical Solutions

- **Operating Theatres**
Integrated surgical environments and advanced theatre systems.
- **Cath Labs**
Advanced interventional cardiology environments.
- **Hybrid Theatres**
Integrated operating rooms for complex interventional procedures.
- **ICU Infrastructure**
Critical care unit setups for intensive patient monitoring.
- **Central Sterile Supply Departments (CSSD)**
Hygienic environments for sterilization and supply management.
- **Oncology Centers**
Oncology and radiation therapy infrastructure solutions.

Clinical Engineering & Biomedical Services

- **Installation & Commissioning**
Equipment deployment and commissioning services.
- **Preventative Maintenance**
Preventative maintenance and lifecycle support.
- **Equipment Calibration**
Adjusting equipment to meet specified accuracy standards.
- **Lifecycle Management**
Overseeing equipment from acquisition to disposal.
- **Technical Support**
Providing expert assistance for equipment-related issues.
- **Biomedical Engineering**
Biomedical engineering and technical infrastructure support.

Digital Healthcare Solutions

PACS/RIS Integration

PACS/RIS clinical imaging integration.

Healthcare Workflow Systems

Workflow automation and operational integration.

Digital Operating Theatres

Integrated digital operating theatre systems.

Healthcare Technology Integration

Unified healthcare technology ecosystems.

Clinical Connectivity

Clinical connectivity and healthcare systems integration.

Strategic Healthcare Technology Partnerships

- **Imaging & Diagnostics**

GE Healthcare
Philips
Siemens

- **Oncology**

Elekta

- **Robotic Surgery**

Intuitive Surgical

- **Orthopaedics**

Conmed
Acumed
Lepine
Swemac

- **Critical Care**

Dräger
Mindray
Abbott

Healthcare Technology Projects

Project Showcase

- **Laminar Flow Operating Theatre Installation**

Installation of advanced operating theatre technology in South Africa.

- **Cath Lab Installation with GE System**

Cath Lab Integration & Clinical Infrastructure Deployment

- **Radiation Oncology Infrastructure**

Radiation Oncology Infrastructure & Technology Integration

- **Robotic Surgery Solutions Deployment**

Implementation of robotic surgery systems in Southern African markets.

- **ICU Infrastructure Projects**

ICU Modernization & Critical Care Integration

Warehousing & Logistics Infrastructure

- **Regional Distribution Operations**

Regional healthcare logistics operations.

- **Inventory Management**

Optimizing stock levels and storage to meet demand effectively.

- **Cross-border Healthcare Logistics**

Cross-border medical supply chain operations.

- **Spare Parts Support**

Ensuring availability and rapid delivery of essential spare parts.

- **Equipment Deployment**

Equipment deployment and field engineering coordination.

Operational Hubs

Global Operations

International business presence supporting healthcare projects, engineering services, and technology integration.

- South Africa
- USA
- UK
- Germany
- UAE
- Portugal
- Hong Kong
- Kenya
- Brazil
- Dominica
- Seychelles
- Cyprus

Executive Leadership

Meet our leadership team

**Milica
Cadenovic**
CEO

Supply Chain
& Logistics

Quality, Compliance & Operational Excellence

Our Commitment

Engineering Standards

International Engineering Standards

Technical Compliance

Ensuring all technical aspects meet regulatory and industry requirements.

Healthcare Quality Assurance

Healthcare Quality Assurance

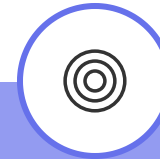

Preventative Maintenance

Proactive measures to ensure the reliability and longevity of equipment and systems.

Clinical Safety Focus

Prioritizing patient safety in all clinical operations and procedures.

Operational Excellence

Striving for maximum efficiency and effectiveness in all operational activities.

Sustainability & Healthcare Impact

Driving positive transformation through sustainable practices

Healthcare Accessibility

Ensuring equitable access to quality care through sustainable resource allocation and innovative delivery models.

Infrastructure Modernization

Upgrading facilities with energy-efficient technologies, resilient designs, and waste reduction strategies.

Sustainable Healthcare Support

Implementing eco-friendly operational practices, supply chain management, and waste disposal systems.

Clinical Innovation

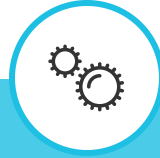

Pioneering new healthcare approaches, treatment modalities, and preventative strategies that are sustainable.

Why CARE TECH SOLUTIONS

International Operations

A network of 12 international offices supporting healthcare clients across 15+ countries.

Engineering Excellence

120+ engineers and technical specialists supporting clinical environments through biomedical engineering, lifecycle management, and technical compliance.

Strategic Partnerships

Authorized distributor of GE Healthcare, Philips, Siemens, Elekta, Intuitive Surgical, ConMed, Dräger, and other leading medical brands.

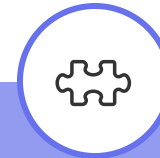

Turnkey Healthcare Expertise

Complete healthcare infrastructure delivery — from design and equipment supply to installation, commissioning, and clinical handover.

Long-Term Support

Preventative maintenance, equipment calibration, spare parts support, and lifecycle management for sustained operational continuity.

Integrated Healthcare Solutions

Unified delivery across medical equipment distribution, clinical engineering, digital integration, and infrastructure modernization.
